Introduction

This document contains the release notes for RepairsLab version 1.0.4. The following sections describe the release in detail and provide late-breaking or other information that supplements the main documentation.

This is a maintenance release that improves quality, reliability, and performance without adding any new functionality. All users of previous 1.0 releases should upgrade to this release.

What's New?

Resolved some simple bugs and created new translation. New important enhancement as data import and export for embedded database, shortcuts keys and update notification.

Installation and Upgrade Notes

For installation see user guide, if you can install RepairLab with installer windows uninstall previous version.

For Upgrading data for embedded database copy <repairslab_old_installation_folder>/db in <repairslab_new_installation_folder>/db.

For non embedded database link new installation to old database.
